Stellar Sci - Edu Ltd

STELLAR SCI-EDU EDUCATIONAL ANATOMICAL MODELS

Stellar Sci-Edu produces high-quality anatomical models. We offer a wide selection that caters to a variety of disciplines. Our clients serve medical professionals, health practitioners, educational organizations, veterinarians, and health-care professionals. The models complement instruction delivered in schools, universities, and colleges, as well as education provided by pharmaceutical companies, medical and dental offices, and model distributors.

Stellar Sci-Edu supplies clients in North America and Europe. Our anatomical models are created with unparalleled precision: they are constructed from PVC and hand-painted to ensure exceptional detail. We can also custom design an anatomical model to fit your specifications.

Some of our models include the following:

- Human Anatomy Models
- Veterinary & Biology Models
- Simulators and Trainers
- Pharmaceutical Promotion
- Acupuncture Models
- Electrical Medical Models

Please visit our website and view our product line for more information:

HUMAN ANATOMY MODELS

Our human anatomy models are available for organs and the skeletal system, in designs appropriate for education levels ranging from primary education to university. Visit www.anatomy-model.com to see our selection.

SIMULATORS AND TRAINERS

Our simulators and trainers play an important role in professional medical training. See our selection at www.anatomy-model.com.

VETERINARY & BIOLOGY MODELS

Our veterinary models are valuable resources for veterinarians and pet owners, while our biology models are perfect for any biology curriculum. Find out more on our website: www.anatomy-model.com.

PHARMACEUTICAL PROMOTION

We supply the pharmaceutical industry with medical educational models suitable for their promotional purposes.
